PROFESSIONAL SUMMARY

ICT graduate with practical experience in **video editing, social media content creation, and digital content management**. Skilled in **CapCut, PowerDirector, and InShot**, with experience creating short-form content using transitions, text overlays, keyframes, visual adjustments, sequencing, and mobile-friendly formatting. Experienced in managing and publishing content on **TikTok, Facebook, and Instagram**. Combines creative content skills with a technical background in web development and digital platforms, bringing strong problem-solving, adaptability, and attention to detail.

VIDEO EDITING & SOCIAL MEDIA PROJECTS

Property Video Portfolio

CapCut | PowerDirector

- Created property-focused short-form videos as **portfolio practice projects** using publicly available property footage and images
- Edited and organized visual content to showcase apartment exteriors, living spaces, kitchens, bedrooms, and compounds.
- Applied transitions, text overlays, keyframes, scaling, visual adjustments, and sequencing to create engaging property content.
- Structured videos with clear **hooks, property highlights, and calls-to-action**.
- Practiced creating mobile-first content suitable for **TikTok, Instagram Reels, and Facebook**.

Social Media Video Content

CapCut | PowerDirector | InShot

- Created and edited short-form social media content for practice and portfolio development.
- Experimented with different editing styles, transitions, text placement, pacing, and visual presentation.
- Practiced creating content designed for mobile audiences and short attention spans.
- Developed an understanding of how visual presentation can be adapted for different social-media platforms.

WEB DEVELOPMENT PROJECTS

Eventora — Full-Stack Event Management Platform

Next.js | TypeScript | React | Tailwind CSS | MongoDB | Mongoose | Clerk

- Built and deployed a full-stack event management platform supporting event discovery, booking, payments, and digital tickets.
- Implemented authentication, protected routes, and role-based access.
- Developed responsive interfaces and database-driven application features and deployed the application using Vercel.

Live Demo: https://eventora-events-five.vercel.app/

Serenity Hotel — Hotel Management System

Next.js | TypeScript | React | Tailwind CSS | MongoDB | Mongoose

- Developed a database-driven hotel management system for rooms, bookings, customers, payments, restaurant items, and orders.
- Implemented authentication, administrative access, responsive interfaces, and API-driven functionality.
- Debugged database, API, authentication, and application issues during development.

Live Demo: https://serenity-hotel-pag9.vercel.app/

PROFESSIONAL STRENGTHS

- Creativity and Visual Presentation
- Attention to Detail
- Team Collaboration
- Adaptability
- Problem Solving
- Communication
- Time Management
- Continuous Learning
